

Circle Alphabet Matching

Instructions: Make two copies. Print on cardstock cut out and laminate. Lay one set of the alphabet on the floor ... table ... or in a pocket chart. Children can put them in alphabetical order. Children place the matching letter on top of each circle with the same letter. I have included both uppercase and lowercase letters... I have also included the letters in two different colors so you can set them up to be either the same letter with the same color or the same letter with different colors.
