Tooth Numbers

Instructions: Print on cardstock ... cut out and laminate. You can use the teeth for a table/floor game by laying down one set of teeth and matching them with the second set of teeth. You can also have the children arrange the teeth in numerical order. These are also great for circle time (for example glue a craft stick to the back of the a tooth and hold it up ... have the children call out what letter it is. You can also attach velcro to the back and use them on a felt board). Use your imagination and have fun!!
