

# Penguin and Heart Color Match

Instructions: There are two different color match activities in this file. The first one is matching hearts to the same color penguins. We put velcro on the blank heart and on the back of the color hearts. Children pick a penguin and place the same color heart on the blank heart. If you are not using velcro you can clip the penguin and heart together with mini clothes pins.

The second activity is find the same color penguin cards and clip them together (make two copies). To make this activity self checking have the children clip the penguins together back to back so the color can be seen on both sides.
