Snowman Sight Words Match

Instructions: Print two copies on cardstock paper ... cut out and laminate. Children pick a snowman card and find the snowman card with the matching sight word. The cards can be clipped together (we use mini clothespins and clip them back to back so the children see the same sight word on both sides).

You can also attach the snowmen cards to a book ring and have the children say the names of the sight words on each card.

For very young children I recommend putting out 5-10 sight word cards to match at a time.
