

Space Shape Matching Cards

Instructions: Print on cardstock paper ... cut out and laminate. Children pick a space card and find the card with the same color. They can clip them together with clothes pins or large paper clips. To make the match self checking children can clip the cards together back to back so that when they flip the cards over they can see they are both the same shape.

I have also include individual shapes that children can place on top of the cards. We used velcro to keep the shapes attached.
